

BC PETRO TAPE
BC PETRO PASTE
BC PETRO MASTIC

BC Petro Tape Series

Perfect Anti-Corrosion and great cost-saving Tape for any metals and pipe lines.

Features

- Provides excellent corrosion protection on steel structures (pipes, valves, flanges, couplings, pilings, etc) and creates a solid water barrier
- Composed of synthetic fabric with petrolatum compound, fillers and special anti-corrosion agents
- Good resistance to acids, alkalis and salts

Characteristics

- Conforms to irregular surfaces
- Great efficiency with easy application and short working times
- No changes in quality under extremely low temperature(-270 °C)
- No cracking, No hardening & solvent free
- Can be applied on the cold & wet surfaces
- Encapsulates lead paints

Uses

- Hydraulic pipes, valves, flanges, elbows and tees
- Underground pipes or tanks
- Steel pilings or marine structures

Corrosion protection for Steel Pipes

■ BC PETRO TAPE SERIES

- **Heat-resistant Tape (H Type)**
Provides excellent temperature suitability
(Service Temperature: -270°C ~ 80°C)
- **Soft and Standard Tape (S Type)**
Soft and wet and outstanding corrosion protection ability
(Service Temperature: -270°C ~ 60°C)

■ BC PETRO PASTE

Primer for increasing adhesion and anti-corrosive property of BC Petro Tape

- **Standard type**
Can be applied on wide range of working places
- **Under Water type**
Designed for under-water application

■ BC PETRO MASTIC

Filler or sealer on the uneven surfaces

- **OUTER WRAPPING TAPE** (Option)
PVC Firm Tape is recommended

Application Instruction

- Remove moisture, oil, dust & scale, etc. on the surface by rag, chipper & scraper.
- Thinly coat with BC Petro Paste (0.3kg/m²)
- Stuff BC Petro Mastic on uneven areas-flanges, valves, cavities, & etc.
- Wrap BC Petro with enough tension to assure conformity to the surface.
- PVC Firm Tape is recommended for the prevention of wrapped BC Petro Tape from mechanical damages and for the good appearance of the wrapped items.
